

This quiz is the first step toward assessing if a student has a vision issue. Write in the appropriate number that best describes how often each symptom occurs:

0=Never, 1=Seldom, 2=Occasionally, 3=Frequently, 4=Always

SYMPTOM	SCORE
Headaches from near work	
Words run together when reading	
Head tilt/closes one eye when reading	
Difficulty copying from board	
Avoids near work/reading	
Omits small words when reading	
Writes uphill or downhill	
Misaligns digits/columns of numbers	
Poor reading comprehension	
Holds reading material too close	
Trouble keeping attention on reading	
Difficulty completing assignments on time	
Always saying "I can't" before trying	
Clumsy, knocks things over	
Does not use his/her time well	
Loses belongings/things	
Forgetful/poor memory	
TOTAL POINTS	

A score of 20 or more points indicates the need for a functional vision exam.

A functional vision exam tests the entire visual system, and is performed by a developmental optometrist.
